

HNB4M Final Project

DESIGN AND FASHION CONSTRUCTION SKILLS: Produce a Fashion Garment

For the final project you will be required to design and construct a fashion garment using the techniques, design elements, and tools/materials discussed in class. In addition to the actual finished product, you will submit a written report about the process.

Your report should include:

1. Identify and describe the item you are planning to construct. Why did you choose to make this product?
2. Describe the elements and principles of design associated with this fashion product.
3. Describe the process from start to finish. What was the design process like? What steps did you take to complete the product? What tools/equipment did you use?
4. Write a reflection on the process. What did you learn throughout this process? What did you enjoy or not enjoy? What would you do differently next time? Was what you learned in class helpful to the process? What connections can you make between what we learned in class and the actual process of creating a fashion product. Other thoughts?
(100 words)

The complete report should include a title page and be **1 page** in length and include an attached picture of the finished product.
