

## **HNB4M Summative**

### **DESIGN AND FASHION CONSTRUCTION SKILLS**

For the summative assignment you will be required to design and construct a product using the techniques, design elements, and tools/materials discussed in class. In addition to the actual finished product, you will submit a written report about the process.

Your report should include:

1. Identify and describe the item you are planning to construct. Why did you choose to make this product?
2. Provide a detailed list of the materials, tools and equipment required to produce this item. What is each tool or piece of equipment used for?
3. Describe the process from start to finish. What was the design process like? What steps did you take to complete the product?
4. Write a reflection on the process. What did you learn throughout this process? What did you enjoy or not enjoy? What would you do differently next time? Was what you learned in class helpful to the process? What connections can you make between what we learned in class and the actual process of creating a fashion product. Other thoughts?  
**(150 words)**

The complete report should include a title page and be **1-2 pages** in length and include an attached picture of the finished product.
